

lightness — innovation — pleasure

**{iossi}** PRO

**The PRO line is a combination of nature and modern technology. It comes in attractive and eco-friendly glass packaging, offering light textures, maximum levels of concentrations, natural composition, and effectiveness backed by numerous instrument tests.**

Can lightness and innovation go hand in hand? The {iossi} PRO line has proved they can. This exclusive series of organic cosmetics is based on the synergy of biocompatible components, essential oils, prebiotics and vitamins formulated using carefully selected concentrations. Innovative solutions applied during the production/creation process have resulted in the light texture of the PRO series cosmetics, while the effort we put into creating perfectly devised formulas make the products a pleasure to use. Selected active ingredients prove beneficial on many levels: from moisturising, through anti-pollution protection and brightening, to deep regeneration.

The {iossi} PRO line stands out due to its all-natural composition, the efficacy of formulas confirmed by research, and unique fragrances that you want to enjoy time and time again.

## Fresh, natural cosmetics created in harmony with nature.

Using the synergy of essential oils and natural plant extracts we produce cosmetics that not only work wonders for your skin but also appeal to your senses. Our aim is to be the best cosmetics company for the world, not the best cosmetics company in the world. We are committed to maintaining a sustainable work ethic at every stage of production, storage and shipping of our goods. By making smart choices regarding our development as a company, we manage resources in a way that will not adversely affect the lives of future generations.

Our cosmetics have been recognized and awarded in many industry competitions.

The ingredients used in our products are sourced with recognition and respect for animal rights. Ethical methods of obtaining raw materials are crucial to us and our integrity as a brand.

We stay current with the latest scientific research to back up the effectiveness and safety of the ingredients that we use, as well as the cosmetics themselves.

We use natural and organic ingredients of the highest quality. All of which are accepted by Ecocert/COSMOS.

As a manufacturer of natural cosmetics we feel obliged to respect the environment we live in. We take part in local campaigns of world cleanups and we cooperate with local state forests and NGO's.

We select the highest concentrations of active ingredients which are safe for everyday use.

The packaging of the PRO line is made of glass – a raw material with unlimited processing possibilities.
